## ALLVOI announces VOIP phone with FREE-500 minutes to India

by MasalaJunction Team on 2009-01-16

*First-of-its-Kind Calling Plan Provides 500 Free Calling Minutes to India, Unlimited U.S. Domestic Calls and Unlimited International Calls to 65 Destinations for only \$14.99 per month*

NEW YORK — January 12, 2009 — Imagine having a cheap VOIP phone for \$14.99 per month that gives you unlimited calling to US and Canada plus 65 other international destinations like Europe, South America, Australia and Asia. Now add to this, 500 free minutes to India per month.

This new offer is the first-of-its-kind to give free calling from the U.S. to India. This unique plan was launched on New Year's Eve by ALLVOI, a World Discount Telecommunications company and provider of low-cost, high-quality broadband telephone service.

Called the ALL India 500 International Unlimited Plan, the service allows South Asians living and working in the U.S. to stay in touch with family and friends in India, around the globe and throughout the U.S. Customers can simply sign up online at [www.allvoi.com](http://www.allvoi.com) and they will be sent a phone adapter that can change any traditional phone to a ALLVOI phone. Once connected, customers can enjoy the VOIP service and the free 500 minutes to India. Customers can also port their existing numbers to ALLVOI for a nominal fee. The service also works with cell phones through a feature called All Mobile.

"We are committed to becoming the number one calling service provider for the rapidly growing, yet woefully underserved, market of South Asians living and working in the U.S. ALLVOI's new plan is priced to be affordable and to give subscribers the convenience of maintaining a budget without the hassle of calling cards and their tedium of dialing endless pins and access numbers. ALLVOI is reliable, easy to use, and is a great bargain," said Roman Talis, President of ALLVOI.

The math is really simple. If one has a VOIP service already, it probably costs \$24.99 per month. Then to dial India, it's an average of 15 cents if you use the VOIP provider. 500 minutes of calling amounts to an additional cost of \$75 making the monthly phone service cost at least \$100. With ALLVOI, you get the same service for only \$14.99 per month for the first 6 months and thereafter \$24.99 per month. Additional minutes beyond the first 500 free minutes only cost 2.5 cents per minute.

"For too long the rapidly growing U.S. South Asian community has paid too much for inferior calling services. Many in this community still use prepaid calling cards that are notoriously unreliable, carry hidden fees, deliver less than advertised," said Talis. "With ALLVOI, it's your VOIP phone plus your India calling service, all bundled into one," he added.

To mark the launch of this cost efficient, path-breaking and unique plan, ALLVOI, raffled a 2009 Lexus at a glittering New Year's Eve celebration in Irvine, Texas. Customers who signed up for the service were entered into the raffle for the car that was won by a Texas resident that night. Over 2500 of the Dallas Fort Worth's South Asian community attended this function that was hosted by Bollywood actress sensation Kashmera Shah and featured performances by numerous popular Indian entertainers.

ALLVOI is currently being promoted on major South Asian TV channels and a heavy campaign in other outlets is being planned in the coming weeks.
